Capacitance

Expressed by three-digit alphanumerics. The unit is picofarad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is expressed by the capital letter " \mathbf{R} ." In this case, all figures are significant digits.

Ex.)	Code	Capacitance
	R50	0.5pF
	1R0	1.0pF
	100	10pF
	103	10000pF

Chip Monolithic Ceramic Capacitors (Medium Voltage)

maRata

For General Purpose GRM/GRJ Series

For Information Devices GR4 Series

Features

- These items are designed specifically for telecommunications devices (IEEE802.3) in Ethernet LAN and primary-secondary coupling for DC-DC converters.
- 2. A new monolithic structure for small, high capacitance capable of operating at high voltage levels
- 3. Sn-plated external electrodes realize good solderability.
- 4. Only for reflow soldering

Applications

- 1. Ideal for use on telecommunications devices in Ethernet LAN
- 2. Ideal for use as primary-secondary coupling for DC-DC converters

Do not use these products in any Automotive Power train or Safety equipment including Battery charger for Electric Vehicles and Plug-in Hybrid. Only Murata products clearly stipulated as "for Automotive use" can be used for automobile applications such as Power train and Safety equipment.

GR4 Series Specifications and Test Methods

Continued from the preceding page.

_	_				
r	No.	Item		Specifications	Test Method
			Appearance	No marking defects	
			Capacitance Change	Within ±20%	Apply 110% of the rated voltage for 1,000 ^{±4} 8 ^h rs. at maximum operating temperature ±3°C. Remove and let sit for 24±2 hrs. at room condition,* then measure.
	17	Life	D.F.	0.05 max.	The charge/discharge current is less than 50mA.
			I.R.	More than 2,000MΩ	Pretreatment Apply test voltage for 60±5 min. at test temperature.
			Dielectric Strength In accorda	In accordance with item No.4	Remove and let sit for 24±2 hrs. at room condition.*

* "Room condition" Temperature: 15 to 35°C, Relative humidity: 45 to 75%, Atmospheric pressure: 86 to 106kPa
